

Ahmed Ibrahim

Front-End Developer (Next.js & React)

 My Portfolio  LinkedIn  GitHub  +201009400163  Alexandria, Egypt

 ahmed.ibrahim.elsayed01@gmail.com

SUMMARY

Computer Engineering student at Alexandria University, building production-grade React and Next.js applications since 2023. Known for animation-heavy UIs with GSAP, and shipping full-stack projects like a real-time Notion clone with 10+ core features. Comfortable with modern tooling, testing, and clean component architecture.

EXPERIENCE

Freelance & Personal Projects — Front-End Developer

Jun 2023 – Present

(Project-Based Experience)

- Designed and built 3+ production-style web applications with a strong focus on UX, performance, and architecture.
- Implemented animation-rich and interactive UI components (e.g., landing pages, lightboxes, utilities) with attention to performance and responsiveness.
- Streamlined development workflows by implementing professional Git/GitHub strategies, including feature branching and pull requests, significantly improving code quality and team collaboration efficiency.

NTI MEAN Stack Summer Training

Aug 2025 – Sep 2025

National Telecommunication Institute 

Certification: [Certification Preview](#) 

- Gained hands-on experience with the MEAN stack (MongoDB, Express.js, Angular, Node.js).
- Applied server-side logic using Express.js (routing, middleware, session handling).

PROJECTS

Blankspace (Notion Clone)

Live: [Blankspace Preview](#) 

Code: [GitHub Repo](#) 

- Built a full-stack note-taking platform inspired by Notion, implementing real-time document synchronization and hierarchical document structures across 10+ core features.
- Implemented authentication with Clerk, media uploads via EdgeStore, and a responsive UI using Tailwind CSS and shadcn/ui with 20+ reusable components.
- Developed productivity features including nested documents, command-palette search, and trash/restore workflows, with state management via Zustand and backend logic in Convex.

Technologies: Next.js, Convex, Zustand, and Shadcn.

Portfolio

Live: [Portfolio Preview](#) 

Code: [GitHub Repo](#) 

- Built a high-fidelity animated portfolio using GSAP, delivering smooth page transitions and scroll-based animations across 5+ interactive sections.
- Added performance optimizations (lazy loading, preloading) to reduce initial load time.
- Ensured full responsiveness across all devices, from mobile to desktop.

Technologies: React, Tailwind, GSAP, Formspree, Zod

Marketing Landing Page

Live: [Marketing Landing Page Preview](#) 

Code: [GitHub Repo](#) 

- Architected a scalable component-based frontend using React and TypeScript, improving maintainability and reusability across sections.
- Applied schema-based validation with Zod to enforce strict data contracts when consuming a mock API, preventing invalid UI states.
- Built with a mobile-first approach, ensuring consistent layout and performance on small screens.

Technologies: React, TypeScript, Tailwind, Zod, Motion.

EDUCATION

Computer and Communications Engineer, Bachelor's Degree

2021 – 2026 | Alexandria, Egypt

Faculty of Engineering, Alexandria University

Relevant Courses: Algorithms, Data Structures, Databases, Networks, Computer Security, and Distributed Systems.

SKILLS

Languages & Concepts

HTML - CSS - JavaScript - TypeScript - Version Control (Git & GitHub) - Performance Optimization - Accessibility (a11y) - Clean Architecture - Software Engineering - Computer Science

Frameworks & Libraries

NextJs - React - Convex - Zustand - Shadcn - GSAP - Zod - Vitest / Jest - React Testing Library - Tailwind CSS
