

Ahmed Ibrahim Front-End Developer (NextJs & React)

✉ ahmed.ibrahim.elsayed01@gmail.com ☎ +201009400163 📍 Alexandria, Egypt 🔗 My Portfolio

🌐 LinkedIn 🐙 GitHub

📄 SUMMARY

Front-End Developer specializing in **React and TypeScript**, with **hands-on experience** building production-style, animation-heavy web applications. Strong focus on **performance optimization, data validation, and clean architecture**. Comfortable working with modern frontend workflows, testing, and real-world project structures.

📁 EXPERIENCE

Front-End Developer
(Project-Based Experience)
06/2023 – Present

- **Designed and built 3+ production-style web applications** with a strong focus on UX, performance, and maintainable architecture.
- **Implemented animation-rich and interactive UI components (e.g., landing pages, lightboxes, utilities)** with attention to performance and responsiveness.
- **Structured and validated application data using Zod**, simulating real-world API contracts and frontend-backend boundaries.
- **Streamlined development workflows** by implementing professional **Git/GitHub strategies, including feature branching and pull requests**, significantly improving code quality and team collaboration efficiency.

NTI MEAN Stack Summer Training
National Telecommunication Institute 🔗
08/2025 – 09/2025

Certification: [Certification Preview](#) 🔗

- **Gained hands-on experience with the MEAN stack** (MongoDB, Express.js, Angular, Node.js).
- **Applied server-side logic using Express.js** (routing, middleware, session handling).
- **Designed and implemented a MongoDB schema for user accounts** and product inventory.

Electrical Engineer Trainee - Robotics Team
M.I.A Team 🔗
06/2022 – 08/2022

An engineering team that specializes in Robotics.

- **Assisted in circuit design and prototyping** exercises using Multisim, following provided specifications and guidance.
- **Practiced working with Arduino microcontrollers**, implementing basic hardware setups and testing functionality.
- **Collaborated with team members** during lab sessions, following task instructions and solving various problems.
- **Followed structured task plans and met session deadlines**, ensuring assigned exercises were completed accurately within limited lab time.

📁 PROJECTS

Blankspace (Notion Clone)

Live: [Blankspace Preview](#) 🔗

Code: [GitHub Repo](#) 🔗

- **Built a full-stack note-taking platform** inspired by Notion implementing **real-time document synchronization and hierarchical document structures** across **10+ core features**.
 - **Implemented authentication with Clerk**, media uploads via EdgeStore, and a responsive UI using **Tailwind CSS and shadcn/ui** with **20+ reusable components**.
 - Developed productivity features including **nested documents, command-palette search, and trash/restore workflows**, with **state management via Zustand and backend logic in Convex**.
- Technologies: NextJs, Convex, Zustand and Shadcn.

Portfolio

Live: [Portfolio Preview](#) 🔗

Code: [GitHub Repo](#) 🔗

- **Built a high-fidelity animated portfolio** using **GSAP**, delivering smooth page transitions and scroll-based animations across **5+ interactive sections**.
 - **Added performance optimizations (lazy loading, preloading)** to reduce initial load time and eliminate layout shifts during animation sequences.
 - Ensured full responsiveness across all devices, from mobile to desktop.
- Technologies: React, Tailwind, GSAP, Formspree, Zod

Marketing Landing Page

Live: [Marketing Landing Page Preview](#) 🔗

Code: [GitHub Repo](#) 🔗

- **Architected a scalable component-based frontend using React and Type Script**, improving maintainability and reusability across sections.
 - **Applied schema-based validation with Zod** to enforce strict data contracts when consuming a mock API, preventing invalid UI states.
 - **Built with a mobile-first approach**, ensuring consistent layout and performance on small screens.
- Technologies: React, Type Script, Tailwind, Zod, Motion.

🎓 EDUCATION

Computer and Communications Engineer, Bachelor's Degree

Faculty of Engineering, Alexandria University

2021 – 2026 | Alexandria, Egypt

Relevant Courses: Algorithms, Data Structures, Databases, Networks, and Computer Security.

🧠 SKILLS

Languages & Concepts

HTML - CSS - JavaScript - TypeScript - Version Control (Git & GitHub) - Performance Optimization - Accessibility (a11y) - Clean Architecture - Software Engineering - Computer Science

Frameworks & Libraries

NextJs - React - Convex - Zustand - Shadcn - GSAP - Zod - Vitest / Jest - React Testing Library - Tailwind CSS
